Preface

This bibliography is a list of bloodstain pattern analysis (BPA) literature that has been collected by the Scientific Working Group on Bloodstain Pattern Analysis (SWGSTAIN) Research Subcommittee. The literature was located within scientific journals, newsletters, technical reports, books, web pages, theses, conference papers, law reports and magazines. The nine hundred titles have been placed into twenty-nine groups and are listed alphabetically within each group. There are duplicate references within the various groups. This is not to be considered a complete list on the topic of BPA. This list will be updated periodically on the SWGSTAIN web site.

The research subcommittee would like to acknowledge the contributions from the SWGSTAIN membership, the Midwest Forensics Resource Center, the Federal Bureau of Investigation, the Institute of Environmental Science and Research, Trent University and the Ontario Provincial Police for their support with this project.

SWGSTAIN Research Subcommittee

Aging Blood
